Fleet Services Vehicles

Fleet Services tracks all costs for maintaining and repairing university vehicles that are owned by the Fleet Services Department. The costs include labor costs, parts costs and any repairs that may be subcontracted to either other campus resources or private service providers. Most Fleet Services vehicles have established rental and lease rates that are inclusive of all maintenance and repair costs so customers are not billed except in cases of abuse, misuse or special customer request.

Other Services

On occasion, Fleet Services provides maintenance and repair services to other university organizations that may own their vehicles. Charges are billed at the campus approved labor rate including overhead costs for both labor and parts.
